PROFILE: I work on **moral psychology** broadly construed to include subfields in both philosophy (**ethics, epistemology, philosophy of science, philosophy of mind**) and social science (**social psychology, personality psychology**). I am ecumenical about methods, having used modal logic, questionnaires, tests of implicit cognition, incentivizing techniques borrowed from behavioral economics, neuroimaging, textual interpretation (especially of **Nietzsche**), **digital humanities** techniques (text-mining, archive analysis, visualization), and of course good old-fashioned intuition-mongering. I have experience working with R, Tableau, and Neo4j.
